# Software Test Report (STR)

Project Name: Wobi
Version: 1
Report Date: 21.8.24

Reported By : Etay Harel

1. Introduction

1.1 Purpose

This document presents the findings of the tests conducted on the Israeli website of the insurance comparison company, **Wobi**. The testing covered the primary functions of the website, including usability, performance, and accessibility. The objective of the report is to highlight key issues, propose recommendations, and assess the overall readiness of the platform for deployment.

1.2 Application Overview

The **Wobi** website serves as a comprehensive web and mobile platform offering financial and insurance services. These include car insurance, home insurance, travel insurance, loan comparisons, pension management, and locating unclaimed funds. The platform acts as a mediator between customers and various insurance providers in Israel, aiming to deliver efficient and reliable service.

1.3 Scope

the test we did for every page:

Functional Testing: Testing all buttons, links, forms, and other functionalities.

Compatibility Testing: Ensuring the website works correctly across all popular browsers and operating systems.

User Interface (UI) Testing: Checking designs, layouts, and responsiveness to different screen resolutions.

Accessibility Testing: Verifying the website's accessibility for people with disabilities.

Security Testing: Assessing the website's vulnerability to common attacks such as SQL Injection or XSS.

Performance Testing: Measuring the website's loading time and performance under load.
